

GTEC CYBER SECURITY PROGRAM

GTEC 2015: CYBER SECURITY PROGRAM

October 19th, 2015 | 7:30 AM – 3:30 PM
Shaw Centre – Room 207, Level 2

Co-Sponsors:

Theme: Are You and Your Organization Ready for a Big Data Breach?

Overview:

'Sony. Target. Heartbleed. The list goes on. Every day, your IT organization is abuzz with news of new hacks, breaches, and vulnerabilities that are coming to light in the media. And every day, your top executives worry that your organization might be next. It's up to you, the IT professional, to participate in these discussions and answer key questions about today's threats.' Information Week - Dark Reading

Cyber security is a shared responsibility, one in which Canadians, their governments, the private sector and our international partners all have a role to play. In this interactive full-day program, hear cyber security experts and industry thought leaders detail the true cost of a security breach, and together explore what you and your organization must do to prepare for the top security issues affecting today's business.

Participant Objectives:

- Identify the costs associated with a security breach from a business perspective
- Advance participant thinking about what tools and practices are available to mitigate these threats
- Engage with experts and have the opportunity to ask the key questions you must answer in your environment
- Build new relationships with peers and like-minded professionals – share new approaches, insights and challenges

Who Should Attend:

- ✓ Managers and Executives involved with or leading security initiatives within the public and private sectors
- ✓ Financial Managers who need to understand why investing up front in cyber security is critical
- ✓ Business and IT people who need to contribute to and deliver on security practices within their organization
- ✓ Employees who want to learn more about cyber security and their role in safe-guarding their organization
